

Modalités de relais des traitements anticoagulants
(février 2015)

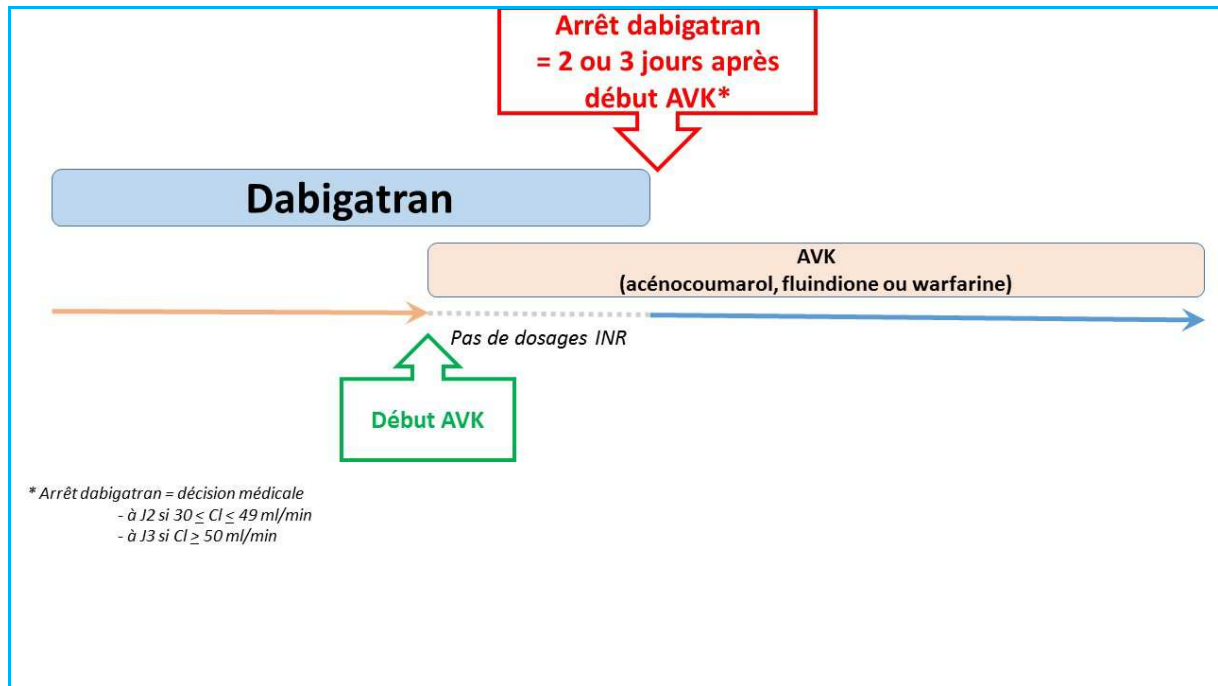

➤ Relais AVK → AOD

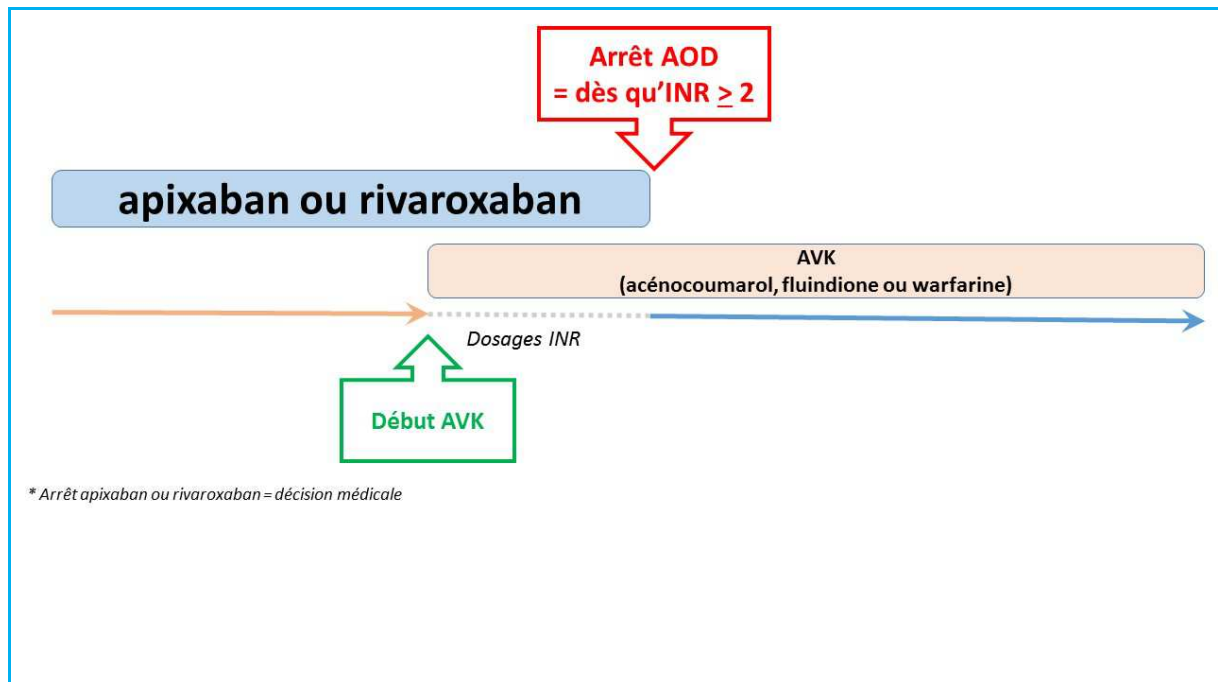

➤ Relais AOD → AVK

Les modalités diffèrent selon la molécule :

Dabigatran (Pradaxa®) → AVK

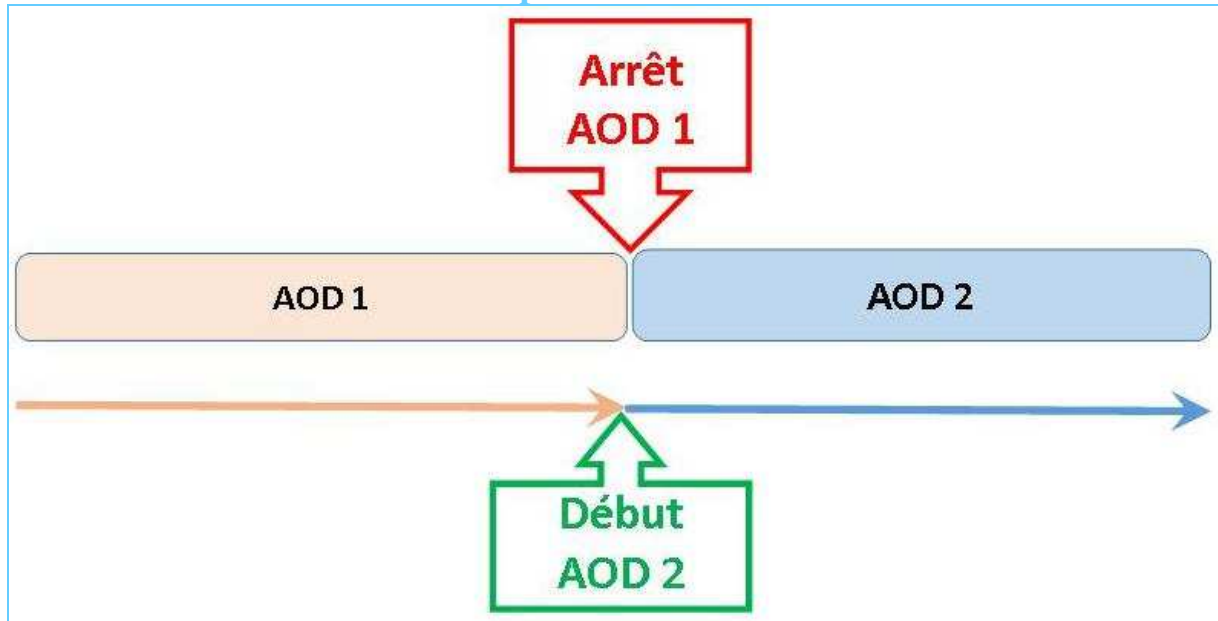

Apixaban (Eliquis®) ou Rivaroxaban (Xarelto®) → AVK

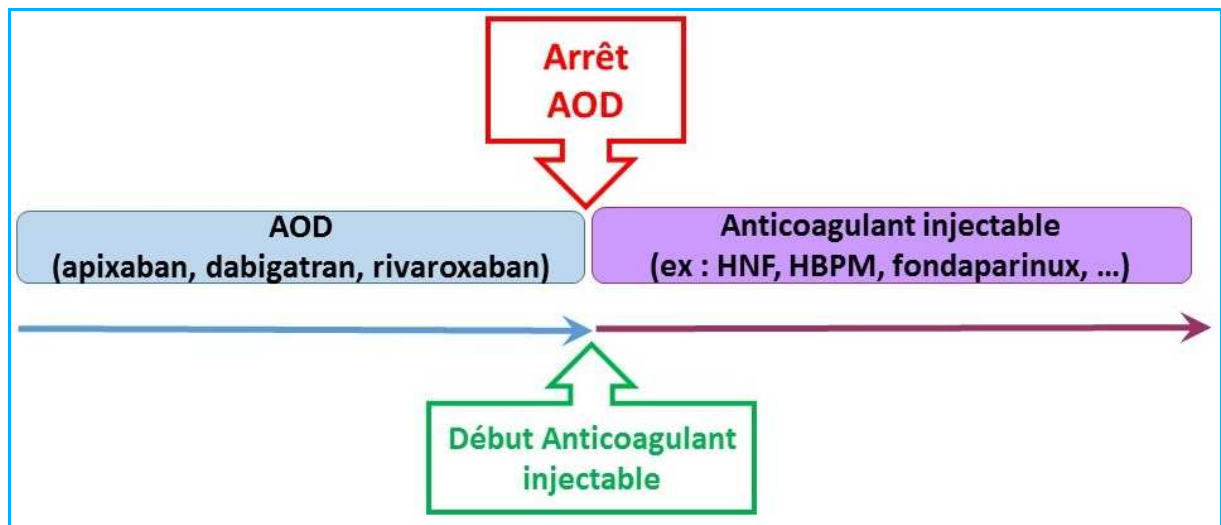

➤ Relais AOD → AOD

Pas de chevauchement entre les prises

➤ Relais AOD ➔ anticoagulant injectable

Pas de chevauchement entre la prise et l'injection

➤ Relais anticoagulant injectable ➔ AOD

Pas de chevauchement entre l'injection et la prise
